

Software Developer – Frontend [View job description](#)

Your Role and Responsibilities

We are seeking talented SW Engineers to join our growing IBM App Connect development team. IBM App Connect is an industry-leading SaaS integration solution that connects any of your applications and data no matter where they reside. With hundreds of prebuilt connectors and customizable templates, organizations can rapidly connect SaaS applications and build integration flows. IBM App Connect makes SaaS integration easy with a simple, no-code interface and incorporates AI-based features, empowering business users to easily map and transform data in a few clicks.

What you will do

- You'll work in a dynamic, collaborative environment. Analysing information received from stakeholders to plan and execute software development for varying needs by creating high-quality application that is robust, readable and scales
- Exploring the areas for improvement and constantly developing the user experience by adding new features
- Analysing bugs and fixing them to ensure the software runs without errors
- Adopt problem-solving as a way of life - always go to the root cause
- You'll employ IBM's Design Thinking to create products that provide a great user experience along with high performance, security, quality, and stability
- Developing and implementing new techniques for testing and validating software systems
- Adopt problem-solving as a way of life - always go to the root cause
- Guiding the software programming efforts
- Directing the compilation of the documentation
- Communicating project statuses and proposals in close collaboration with clients and other internal departments
- Maintaining and enhancing current codebases, and peer-reviewing code modifications
- Keep abreast with emerging technologies by doing the study, going to classes, etc.

Who You Are:

- You are driven and passionate about developing and promoting excellent products.
- You excel at problem-solving, debugging, and troubleshooting.
- You have a thorough knowledge of programming languages and software development.
- You have the ability to learn new skills quickly and use the skills efficiently
- You developed the deep knowledge of cutting age technologies
